#### Application Review Classifier (08/2019 – Present)

- A web platform where a customer or a developer can search for an app and get all the reviews classified to bug fix or feature request and not only the classification, he/she can also view the overall sentiment of an app

#### Home3Circuit (04/2019 – 05/2019)

- A Project Developed With Deep learning Involving RNN Neural Networks with tensorflow and keras to identify how homestays get Impacted in terms of Enviromental factors.

#### Hometeq (09/2018 – 02/2019)

- A PHP E-Commerce Backend project developed to order tech goodies from online.

## SKILLS

Java

Python

Angular

Node js

React

Flutter

Communication

React native

PHP

Django

Flask

MYSQL

NoSQL

## ACHIEVEMENTS

Cutting Edge - 3rd Place (03/2019)

Hack X - 2nd Place (05/2019)

Real Hack - 1st Place (08/2018)

## ORGANIZATIONS

#### Hejaaz International Computer Society (05/2015 – 05/2017)

Secretary

#### Hejaaz International Science Society

Chairperson

#### IEEE Computer Society (12/2019 – Present)

Vice Chairperson

## WORK EXPERIENCE

#### Rootlabs - Software Developer Intern (05/2018 – 08/2018)

Rootlabs was a really good company. Got many tasks and opportunities working as a summer intern. Worked on many backend and machine learning projects.

## INTERESTS

Research machine learning algorithms.

Love to contribute to open source organizations.
