EDUCATION

School Hejaaz International School

01/2005 - 12/2017 Mount Lavina, Colombo Sri-Lanka Education

Grade 1- O/L (Local) - 5A 2B 2C

University Informatics Institute Of Technology

01/2018 - Present Wellawatte, Colombo Sri-Lanka

Undergraduate Education

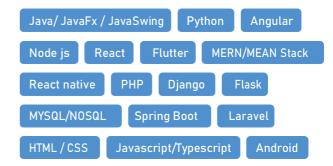

Software Engineer
 Foundation – 1st Class
 BEng(Hons)
 (Average – 73%)

 1st Year - 1st Class (Average - 81%)

Academic Performance

denne i enormance			
•	Web Design and Development	- 93	
•	Computer System Fundamentals	- 84	
•	Computer Science Practice	- 72	
•	Mathematics for Computing	- 82	
•	Programming Principles 01	- 90	
•	Programming Principles 02	- 76	
•	Object Oriented Programming	- 81	
•	Database Systems	- 84	
•	Client Server Architecture	- 80	
•	Software Development		
	Group Project	- Pending	
•	Server Side Web Development		
		- Pending	
•	Algorithm Theory Design		
	& Implementation	- Pending	

PROFESSIONAL SKILLS

SOFT SKILLS

- Problem Solving
- Communication
- Team Work

ACHIEVEMENTS

Cutting Edge - Participation (03/2019)

Hack Stat - Quater Finalist (05/2019)

RB Gloabal Challenge - 2nd Runner Up

International Computing Driving License - Distinction

Hash Code (2019) – 6853^{rd} place & Hash Code (2020) – 6156^{th} place (globally)

IEEE Xtreme (13.0) – 44th place in Sri-Lanka

ORGANIZATIONS

Hejaaz International Computer Society (05/2015 - 05/2017)

Secretary

Hejaaz International Science Society (05/2015 - 05/2017)

Chairperson

IEEE Computer Society (12/2019 - Present)

Vice Chairperson

Mozilla Club (02/2018 - Present)

Member

PROJECTS

Real time DICOM Meta-data extractor (05/2018 - 08/2018)

A native java application for android mobile that converts DICOM medical images to its relevant metadata in real-time and displays it to user along with the DICOM image.

Drop (04/2019 - 06/2019)

Drop - An online mobile application where private hospitals and blood banks can contact a person for a blood of that type and track that persons location via GPS.

Cooking With Class (01/2019 - 03/2019)

 Cooking With Class - a mobile application done for a client in order to buy recipes online

Application Review Classifier (08/2019 - Present)

A web application where users can search for an app from play store and get all reviews classified for that app to bug fixes and feature requests, also it displays the overall sentiment of the app.

Home3Circuit (04/2019 - 05/2019)

A web platform project developed With Deep learning Involving RNN Neural Networks with tensorflow and keras to identify how homestays get impacted in terms of Environmental factors.

Hometeq (09/2018 - 02/2019)

A PHP E -Commerce Backend project developed to order tech goodies from online.

Vehicle Rental Management System (11/2018 -12/2018)

A frontend angular project integrated with spring boot as backend to rent cars online.

Innovative - E (03/2018 -04/2018)

A Javafx project developed to keep record of employee's point of sales where MYSQL was used as database to store the details.

WORK EXPERIENCE

Rootcode labs - Software Developer trainee (05/2018 - 08/2018)

Rootcode labs was a good company. Got many tasks and opportunities working as a summer intern. Worked on many back end and machine learning projects

INTERESTS

Researching on Artificial Intelligence and Machine Learning

Researching on AWS & Big Data.

Researching on how Block chain works.

Love to contribute to open source organizations.
